WORK HISTORY

I've started working as a freelancer in February of 2016. Since then I've worked on 50+ different projects. Some of my larger projects include:

Zenkraft (July 2019 - now)

I'm the lead on the API side, maintaining and improving our shipping platform and making our B2B clients happy. The startup was recently acquired by Bringg.

Newchip (August 2018 - May 2019)

My role was a Django API developer for a FinTech startup. Newchip's main product was an iOS app and I was responsible for the API built on Django (DRF) running on Heroku.

Sonder (September 2017- August 2018)

As a Data Engineer in a hospitality startup I've created an ETL process/Data Warehouse and integrated over 43 different data sources. My work helped with marketing efforts of the company

EDUCATION

Masaryk University in Brno
Information Systems
Sep 2014 - Jan 2016

Masaryk University in Brno
Computer Systems and Data Processing
Sep 2011 - Bc. in Sep 2014
